

Art for Week 4

MAA Grades 6-8

Art this week is found [HERE](#).

Hey, fellow artists! Last week, many of you tried the tutorial for drawing a human eye...I LOVED the e-mails showing me your work – fantastic! This week, I want to share a tutorial on drawing a human mouth and teeth...tough one! All you will need are a pencil, an eraser, a ruler and a Q-tip. In this tutorial, the artist uses pencil shavings to help with shading, but remember that if you use the side of the lead of your pencil while shading (to get a really light value), you can then use a Q-tip OR finger-smudge to play with value scales...happy drawing! Keep sending me your pictures! :) -Mrs Thorne
