

Hello All!

For those students interested in the concepts that were left to be covered in our Math class this year, I've compiled a list of lessons from the University of Waterloo that correspond to our curriculum. Please remember that no formal assessment of these concepts is possible, but you may email me with specific questions or screenshots, and I'll do my best to help you. Also remember that these are "Suggestions for Home Learning" and are not obligatory in any way. The dates are also just suggestions. You should work at your own pace and be kind to yourself when you are struggling, since the same supports offered in class are not always available at home.

Happy Math-ing! And I miss you all dearly.

Ms Barrieau

Grade 7 Math Focused Curriculum Plan of Action for Learning Opportunities April-June 2020	
Addition and Subtraction of Fractions	
April 6-10th	Equivalent Fractions Adding Rational Numbers on the Number Line
April 13-17th	Adding Rational Numbers Subtracting Rational Numbers
Ratio, Percent, Probability	
April 20-24th	What are ratios? Equivalent Ratios Percentages
April 27-May 1st	Probabilities of Single Events Independent Events
May 4-8th	Experimental Probability Using Probabilities to Make Predictions Experimental Versus Theoretical Probability
Shape and Space	
May 11-15th	Area of Parallelograms, Triangles, Trapezoids Circumference and Area of a Circle
May 18-22nd	Organizing Data in Graphs Interpreting Data in Graphs
May 25-29th	Angles and Intersecting Lines Parallel Lines and Transversals
Points on a Cartesian Plan and Transformations	
June 1-5th	The Cartesian Coordinate System Graphing Images Under Translations
June 8-12th	Graphing Images Under Reflections Graphing Images Under Rotations
Buffer	
June 15-19th	Buffer for extra time and/or General Grade 7 Math through Dreambox
