

## Music for Week 9

### MAA Grades 6-8

Stomp! Is a percussion group that performs around the world using nontraditional instruments. Watch some of their videos [HERE](#).

Think about what is used to create their music.

Think about things that you have in your own house that could be used as instruments. Explore different ways of creating sound with the same object – for example, a broom could be dragged AND pushed in a sweeping motion, it could be hit on the floor on either the sweeping end or the handle.

Make a list of objects that you have explored – this will be used next week to create your own piece of music.
