

## How to make a cloud in a jar using hairspray

For this method, you will need the following materials:

- A jar with lid
- About 1/3 cup hot water
- Ice
- Hairspray

Start by pouring the hot water into the jar. Swirl it around a bit to warm up the sides of the jar.

Turn the lid upside down and place it on the top of the jar. Place several ice cubes onto the lid, and allow it to rest on the top of the jar for about 20 seconds.

Remove the lid, quickly spray a bit of hairspray into the jar, and then replace the lid with the ice still on top. Watch the cloud form.

When you see a good amount of condensation form, remove the lid and watch the "cloud" escape into the air.
